

Tuesday Value Education #10

18/04/2023

→ The community has been discriminated against for millennia.

If we do not bring them up with some privilege so that they reach the same level as the rest of us some day, it would be unfair.

→ ~~The~~ I think the enormity of the problem is underestimated, and it is more evident as we expose ourselves to the rural parts of the country, ~~where~~ and see how horribly discrimination can get.

→ Dalits cannot enter your house & they cannot drink tea in the local tea shop, their children cannot sit with non-dalit. This is certainly not acceptable for any human being.

//_

→ Just because somebody ~~is~~ thinks its unfair because they did not get into a college or a course does not nullify this whole problem.

→ This should be approached with more care and consideration.

→ A Identify Rural & Urban Dalit

→ Generation wise dalit reservation.

→ This does not mean there should be a compromise on competence.

→ simply passing a student because he belongs to a certain caste is also wrong.

→ By doing this, we are bringing down the competence level of our country.

→ Instead, we should strive to create equal opportunity.

→ This is in accordance with the third bullet of the preamble

= equality of opportunity.
